

Providing Expert IT and Security Managed Services for Alternative Investment Firms

Cybersecurity Defense-in-Depth

All Abacus solutions include leading-edge security solutions, delivered by our team of certified security professionals through a unique, methodical and structured approach. Our defense-in-depth cybersecurity philosophy includes an appropriate governance and policy structure, continuous security education, and robust and scalable security architecture, monitoring and innovation.

Features and Benefits

Leveraging data from across your environment, **abacusFlex** services and solutions:

- Manage Vulnerabilities
- Monitor for Malicious Behavior
- Investigate and Shut Down Attacks
- Automate Your Operations

With the secure **abacusFlex** platform, you will:

- Free up team members to focus on strategic priorities
- Gain confidence that you will achieve the right security outcomes based on your firm's business goals

Dedicated Information Security Team

We have a dedicated Cybersecurity Operations Team who proactively manages our platform's security and risk to protect your environment.

Cybersecurity Awareness Education

When it comes to cybersecurity, your users are the first line of defense. We provide a comprehensive, annual cybersecurity education program for all users of our **abacusFlex** service, consisting of three components:

- Cybersecurity Training
- Phishing Tests
- Compliance Reporting
