The Abacus Platform: An Integrated IT and Cybersecurity Ecosystem

abacusFlex

Our flagship **abacus**Flex platform is a comprehensive suite of managed IT and cybersecurity solutions wrapped in our premium 24 x 7 service. Our scalable, secure and compliant ecosystem is trusted by more than 700 financial services customers globally. Through our tiered subscription model, **abacus**Flex provides a full spectrum of security controls from baseline protection to advanced enterprise-grade solutions, and offers clear guidance on requirements for regulated and non-regulated firms. Backed by our proven experience, **abacus**Flex empowers you to scale securely as your needs evolve.

Proven Expertise

Our teams have years of experience specifically focused on the unique needs of the financial services industry and in the technologies you require.

Single, Best-in-Breed Solution

We have developed a secure and scalable solution that integrates the best technologies and cybersecurity capabilities in a single platform.
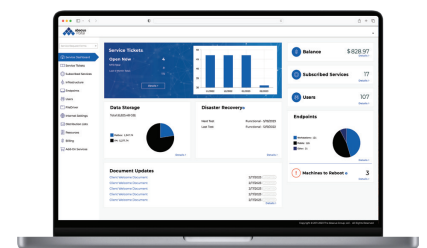

Adapts With You

Our solution meets your needs where you are today and evolves with you as your requirements change.

Defensive and Offensive Cybersecurity Services

The Cybersecurity Blue Team at Abacus Group is responsible for architecting, maintaining and defending your firm's information systems with robust security measures, maximizing your security and ensuring regulatory compliance with organizations like the SEC and FCA. Meanwhile, our dedicated Red Team emulates real-world threats to test and enhance system security against evolving risks before hackers strike. This dedicated, highly-specialized division of experts complements our Blue Team of security operations and GRC analysts. Between these two teams, our clients can see their entire risk management lifecycle in action, from detecting new vulnerabilities to risk remediation.

Compliance Tools

The **abacus**Portal improves your firm's risk management and ease of operations by providing transparency and control over your technology platform. Our suite of IT, cybersecurity and compliance-focused tools includes templated policy documents and live reports on critical activity and information.
